## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1, 2, 6-11 and 13 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kagan et al '866.

Kagan et al disclose a system 10 usable for treating atrial fibrillation comprising an active electrode 29 and a return electrode array 16 shown in Fig. 1 with a surface area greater than that of electrode 29.

Kagan et al disclose an active, energy-delivering electrode. See col. 2, lines 54-56.

"The tip electrode assembly 29 provides an electrical potential reference..."
